PROFESSIONAL SUMMARY

Junior Data Analyst and Computer Science student with hands-on experience in SQL, Power BI, Excel, Python, and Tableau through practical training and data analysis projects. Skilled in data cleaning, ETL, data modeling, statistical analysis, dashboard development, and KPI reporting. Experienced in transforming raw data into meaningful insights and interactive dashboards that support data-driven decision-making. Strong attention to detail, analytical thinking, and problem-solving skills, with a focus on continuous learning and professional growth.

TECHNICAL SKILLS

Tools & Platforms: SQL, Power BI, Tableau, Microsoft Excel (PivotTables, VLOOKUP/XLOOKUP, Power Query), Google Sheets, Python (Pandas, NumPy), DAX, Git & GitHub

Techniques: Data Cleaning, Data Validation, Exploratory Data Analysis (EDA), Data Modeling, Statistical Analysis, ETL, Data Visualization, Data Reporting, Data Storytelling, KPI Reporting, Business Intelligence, Dashboard Development

Soft Skills: Communication, Problem-Solving, Attention to Detail, Team Collaboration

WORK EXPERIENCE

Data Analysis Trainee — *Digital Egypt Pioneers Initiative (DEPI)* Jul 2026 – Present

- Gained hands-on experience in Excel and Power BI through practical, project-based data analysis training.
- Completed multiple applied workshops covering Excel, Power BI, data visualization, and reporting techniques.
- Applied data cleaning, analysis, KPI development, and dashboard design techniques to practical datasets.

Problem Solving Trainee — *ICPC*

- Solved 100+ competitive programming problems, developing analytical thinking, algorithmic reasoning, and structured problem-solving skills.
- Applied systematic approaches to break down complex problems and develop efficient solutions under time constraints.

PROJECTS

Salla Call Center Dashboard | *Power BI • DAX • Power Query*

- Developed an interactive Power BI dashboard to monitor key call center performance indicators.
- Cleaned and transformed a raw dataset containing 450 records and 12 fields using Power Query.
- Created custom DAX measures and a dedicated date table to support time-based performance analysis.
- Performed Year-over-Year (YoY) analysis to identify changes in call center performance.
- Analyzed call abandonment and service performance to identify areas requiring operational improvement.

Repository: github.com/Mohamed32213/Sallah-Call-center-Dashboard

Adidas Sales Dashboard | *Power BI • Excel*

- Cleaned and analyzed a dataset containing 9,070 records across 13 fields to evaluate sales and operating performance.
- Built a 3-page Power BI report consisting of a cover page, KPI dashboard, and insights page.
- Developed 4 key KPIs and multiple interactive visualizations to monitor revenue and business performance.
- Analyzed regional sales performance and identified the West region as the highest-performing region in the dataset.

Repository: github.com/Mohamed32213/Adidas-Dashboard-powerBI

Massive Company Dashboard | *Excel • Power Query • PivotTables*

- Designed an interactive Excel dashboard by consolidating multiple raw datasets into a unified reporting solution.
- Used Power Query to clean, transform, and combine data from 5+ datasets.
- Applied PivotTables and PivotCharts to analyze more than 10,000 records.
- Developed a structured reporting solution to simplify data exploration and performance monitoring.

EDUCATION

Bachelor of Computers and Artificial Intelligence — Fayoum University Expected 2028

Major: Computer Science (CS)

CERTIFICATIONS

- Data Analysis Track — Digital Egypt Pioneers Initiative (DEPI) (In Progress)
- Data Analysis Diploma
